

TABLE OF CONTENTS

Preface

xv

Chapter 1	Freshwater Environments, Ecosystem and Microorganisms	1
	Freshwater Environments	1
	Humans and Freshwater HAB-associated Illnesses	1
	Skin Contact and Inhalation Expanded	1
	Freshwater Ecosystem	2
	Extinction of Freshwater Fauna	2
	Freshwater and Freshwater Ecosystems	3
	Historical Background and Scientific Foundations	3
	Impacts and Issues	4
	Human Impacts on Freshwater Ecosystems	5
	Habitat Alteration	5
	Overuse	5
	Pollution Run-off	5
	Wastewater	5
	Protecting the World's Freshwater Ecosystems	6
	Going Beyond Clean Drinking Water to Tackle Ecosystem Health	6
	Man-made Stressors Deteriorate Freshwater Ecosystems	7
	Guidelines Drafted by UNU-EHS' Network of Scientists	8
	Microorganisms for which Freshwater is their Natural Habitat	8
	Bacteria	8
	Algae and Cyanobacteria	8
	Identification of Planktonic Algae (or Phytoplankton)	10
	Zooplankton	10
	Lake Ecosystem	12

Important Abiotic Factors	12
Lentic System Biota	15
Trophic Relationships	18
Community Patterns and Diversity	20
Natural Lake Lifecycles	21
Human Impacts	22
Freshwater Marshes	23
Freshwater Marsh - Bog	24
Freshwater Wetlands	25

Chapter 2	Aquatic Organisms and Microorganisms	26
	Microorganisms	26
	Bacteria	26
	Fungi	27
	Protozoa	27
	Algae and Phytoplankton	27
	Periphyton and Biofilm	28
	Marine Microorganism	28
	Overview	29
	Marine Viruses	31
	Prokaryotes	33
	Eukaryotes	36
	Aquatic Organisms: Plants	38
	Macrophytes	38
	Riparian Vegetation	39
	Aquatic Plant	39
	Morphological Classification	40
	Aquatic Plants and Flowers	41
	Function, Physical Characteristics and Adaptation of Aquatic Plants:	41
	Evolution	42
	Aquatic flowers	43
	Care of Plants and Flowers	44
	Use of Aquatic Plants to Man	45
	Aquarium Plant Species	46
	Aquatic Organisms: Invertebrates	46
	Marine Invertebrates	47
	Evolution	48
	Classification	49
	Marine Sponges	51
	Marine Cnidarians	53
	Marine worms	55
	Echinoderms	57

Marine Arthropods	59
Other Phyla	60
Minerals from Sea Water	61
Using Benthic Invertebrates as Bioindicators	61
Aquatic Organisms: Vertebrates	62
Amphibians	63
Reptiles	63
Marine Vertebrate	64
Fishes	64
Amphibians	65
Reptiles	66
Birds	67
Factors Affecting Aquatic Ecosystems	67
Natural Factors Affecting Aquatic Ecosystems	68
Beavers	68
Flooding	68
Human Influences on Aquatic Ecosystems	69
Bioaccumulation and Biomagnification	69
Endocrine Disrupting Substances	69
Climate Change	70
Atmospheric Deposition	71
The Boreal Forest and Biodiversity	71
The Distribution of Boreal Forests	71
The Boreal Forest Environment	72
The Physical Environment	72
Boreal Forest Zones	73
Biodiversity in the Boreal Forest	74
Biodiversity in the Boreal Forest: Trees	74
Biodiversity in the Boreal Forest: Shrubs, Mosses and Lichens	74
Biodiversity in the Boreal Forest: Mammals	75
Biodiversity in the Boreal Forest: Birds	75
Impacts on Boreal Forests and Biodiversity	76
Oil and Gas	76
Forestry	76
Mining	76
Hydroelectric Development	77
Boreal Species	77
Plants	77
Birds	79
Mammals	80
Reptiles and Amphibians	80
Insects	81

Fish	81
Benefits	82
Disturbances and Threats	82
Action.....	83
Chapter 3 Unicellular Freshwater Organisms and Environments	85
Unicellular Organism.....	86
Evolutionary Hypothesis.....	86
Prokaryotes.....	87
Eukaryotes.....	88
Macroscopic Unicellular Organisms.....	91
Bacteria (Kingdom).....	91
Blue-Green Algae (Division: Cyanophyta).....	92
Protista (Kingdom).....	93
Euglenids (Division: Euglenophyta).....	94
Green Algae (Division: Chlorophyta).....	95
Diatoms (Class: Bacillariophyceae).....	97
Amoeba (Class: Rhizopoda).....	98
Heliozoa (Class: Actinopoda).....	99
Ciliates (Class: Ciliata).....	99
Where and How to Collect Protists.....	101
Raising Protists.....	101
Raising Haematococcus.....	102
How to Observe Protists.....	103
Some Inconspicuous Free Swimming Branching Colonies of Biflagellated Freshwater Protists.....	104
Small Multicellular Organisms.....	106
Rotifers.....	107
Sponges, Jellifishes, Hydrae.....	108
Flatworms and Annelida.....	108
Bryozoans.....	109
Water Snails.....	110
Tardigrades.....	110
Crustaceans.....	111
Aquatic Insects.....	111
Mosquitoes.....	113
Beneath the River Pebbles.....	115
Water Spiders.....	115
Eggs and Larvae of Amphibians.....	115
Multicellular Organism.....	117
Evolutionary History.....	118
Hypotheses for Origin.....	119

Advantages	122
Taking a Look at Pond Water Organisms	122
Arthropods	122
Bacteria	123
Protozoa	123
Hydras	124
Algae	124
Chapter 4 Marine Organisms	126
Experiments	127
Some More Information	128
Marine Life	128
Water	129
Evolution	130
Marine Algae and Plants	133
Vertebrates	137
Marine Tetrapods	141
Plankton	146
Biogeochemical Cycles	147
Biodiversity and Extinction Events	147
Marine Biology	148
Marine Habitats	149
Overview	150
Ocean Currents	151
Marine Topography	152
Biomass	152
Coastal	152
Open Ocean	160
Adaptations of Marine Organisms	161
Bottlenose Dolphins	162
Different Types of Adaptations	162
Structural Adaptations	162
Physiological Adaptations	163
Behavioural Adaptations	163
Chapter 5 Effects of Pollutants on the Aquatic Environment	164
Habitat Degradation	164
Altered Water Chemistry and Reduced Biodiversity	164
Health Hazards	165
Drinking Water Contamination	165
Impact of Pollution on Aquatic Resources	165
The Effects of Sewage on Aquatic Ecosystems	167

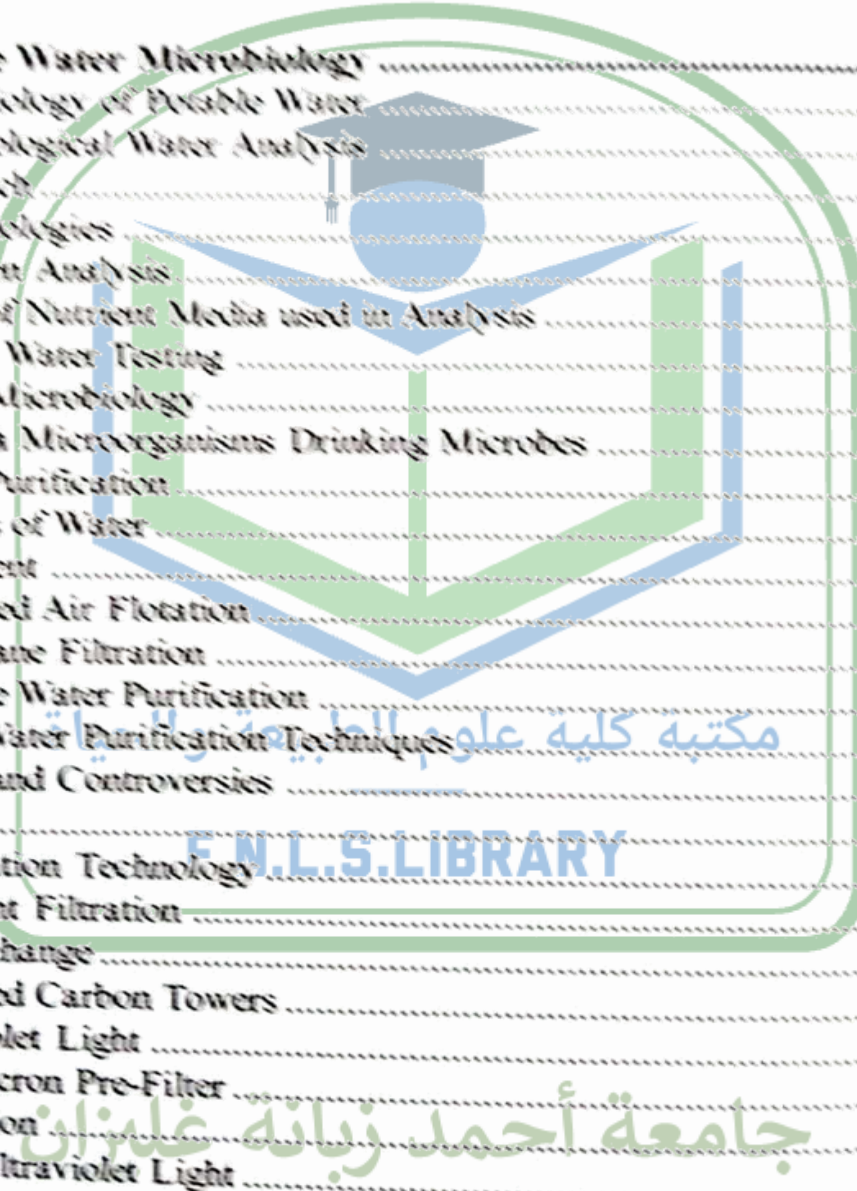

Eutrophication	168
Community Dynamics	168
Hypoxia	169
Antibiotics and Hormones	169
Effects of Water Pollution on Aquatic Ecosystems	170
Pollution-tolerant Organisms	170
Marine Pollution	171
History	171
Pathways of Pollution	172
Types of Pollution	176
Adaptation and Mitigation	181
Laws and Policies	181
Aquatic Toxicology	182
History	182
Aquatic Toxicity Tests	183
Toxicological Effects	186
Important Aquatic Toxicology Resources	186
Terminology	187
Significance in Regulatory Context	188
The Hydrological Cycle	188
The Hydrologic Cycle and Interactions of Ground Water and Surface Water	189
Interaction of Ground Water and Streams	191
Interaction of Ground Water and Lakes	192
Interaction of Ground Water and Wetlands	193
Evolution of Water Chemistry in Drainage Basins	194
Chemical Interactions of Ground Water and Surface Water in Streams, Lakes, and Wetlands	195
Interaction of Ground Water and Surface Water in Different Landscapes	196
Mountainous Terrain	197
Riverine Terrain	199
Coastal Terrain	200
Glacial and Dune Terrain	201
Karst Terrain	202
Sources of Pollution	204
Organic Materials	205
Effects of Sediment on the Aquatic Environment	207
Historical Perspective	208
System Complexity	208
The Hillslopes	210
The Streams	210

Types of Streams and Planform Characteristics	212
Hydraulic and Sediment Characteristics of Streams	215
Transport Patterns of Sediment and Organic Material	219
Streambank stratigraphy, characteristics, and types of failures	220
Aquatic Habitat Characteristics of Streambeds	222
Sediment Quality of Streams	225
Current Status of Research	229
Recommendations for Future Research in Streams	230
The Lakes and Reservoirs	231
Types of Lakes and Reservoirs	231
Hydraulic and Sediment Characteristics of Lakes	233
Aquatic Habitat Characteristics	234
Sediment Quality of Lakes	235
Current Status of Research	236
Recommendations for Future Research in Lakes and Reservoirs	236
The Estuaries	237
Types of Estuaries	238
Hydraulic and Sediment Characteristics of Estuaries	239
Aquatic Habitat Characteristics	240
Sediment Quality of Estuaries	241
Current Status of Research	241
Recommendations for Future Research in Estuaries	242
Influence of Land Use	242
Forestry	243
Range	243
Agriculture	244
Industrial	246
Urban	246
Water Resources	247
Conservation Management Systems	247
Concluding Remarks	249
Plant Nutrients	250
Blue-green Algae (Cyanobacteria)	251
Unicellular Green Algae	251
Biological Pollutants	252
Pathogenic Bacteria	253
Coliforms	253
Faecal Streptococci	254
Clostridium Perfringens	254
Viruses	255
Protozoa	256
Helminths	256

Toxic Pollutants	٤٢
Pesticides	٤٢
Physical Pollutants	٤٣
Suspended Solids	٤٣
Immiscible Liquids	٤٣
Discharges Contributing to a Temperature Change	٤٣
Discharges Causing Variations in Flow Rate	٤٣
Substances Causing Taste, Odour and Coloration	٤٣

Chapter 6

Potable Water Microbiology	٤٤
Microbiology of Potable Water	٤٤
Bacteriological Water Analysis	٤٤
Approach	٤٥
Methodologies	٤٥
Pathogen Analysis	٤٥
Types of Nutrient Media used in Analysis	٤٥
Potable Water Testing	٤٥
Water Microbiology	٤٥
Bacteria Microorganisms Drinking Microbes	٤٥
Water Purification	٤٥
Sources of Water	٤٥
Treatment	٤٥
Dissolved Air Flotation	٤٥
Membrane Filtration	٤٥
Portable Water Purification	٤٥
Other Water Purification Techniques	٤٥
Safety and Controversies	٤٥
History	٤٥
Purification Technology	٤٥
Sediment Filtration	٤٥
Ion Exchange	٤٥
Activated Carbon Towers	٤٥
Ultraviolet Light	٤٥
One Micron Pre-Filter	٤٥
Ozonation	٤٥
More Ultraviolet Light	٤٥
More Ozonation	٤٥
Storage, Ozonation and Recirculation	٤٥
Bottling Process	٤٥
Water Quality	٤٥
Standards	٤٥
Categories	٤٥
Environmental Water Quality	٤٥

Sampling and Measurement	295
Testing in Response to Natural Disasters and Other Emergencies	296
Standards and Reports	300
Waterborne Diseases	302
Overview	302
Drinking Water Quality Standards	303
Range of Standards	304
Parametric Values	304
Australian Standards	304
European Union Standards	305
United States Standards	305
World Health Organization Guidelines	306
Comparison of Parametric Values	306
Human Viruses in Water	308
History	309
Viruses Present in Water	309
Virus Survival in Water	310
Virus Removal from Water	311
Prevention of Water Viruses	311
Pathogens - Spread of Pathogens	312
Transmitted Water Bacteria Disease	312
<i>Bibliography</i>	313
<i>Index</i>	317
