

# TABLE OF CONTENTS

Preface

xiii

<b>Chapter 1</b>	<b>Introduction to Cell and Tissues</b>	<b>1</b>
	Introduction to Cell	1
	Types of Cells	2
	Prokaryotic Cells	2
	Eukaryotic Cells	9
	Subcellular Components	17
	Membrane	18
	Cytoskeleton	28
	Genetic Material	35
	Organelles	35
	Structures Outside the Cell Membrane	37
	Cell Wall	37
	Prokaryotic	37
	Cellular Processes	38
	Growth and Metabolism	38
	Replication	38
	Protein Synthesis	39
	Motility	41
	Multicellularity	41
	Evolutionary History	42
	Hypotheses for Origin	43
	Advantages	46
	Cell Specialization	46

Origin of Multicellularity .....	46
Origins .....	47
Origin of the First Cell .....	47
Origin of Eukaryotic Cells .....	47
History of Research .....	47
Tissues .....	48
Animal Tissues .....	48
Connective Tissue .....	49
Muscle Tissue .....	49
Nervous Tissue .....	49
Epithelial Tissue .....	49
Plant Tissues .....	50
Meristematic Tissues .....	50
Permanent Tissues .....	51
Mineralized Tissues .....	54
Hierarchical Structure .....	55
Diseased Mineralized Tissues .....	56
What is the Source of New Cells for Tissues? .....	57
How Do Non-Growing Tissues Maintain Themselves? .....	58
What Cellular Components Support Tissue Structure? .....	58
How Does the Extracellular Matrix Support Tissue Structure? .....	59
<b>Chapter 2 Basic Concepts in Genetics</b> .....	<b>60</b>
Introduction .....	60
History .....	62
Mendelian and Classical Genetics .....	63
Molecular Genetics .....	63
Inheritance in Biology .....	64
Genes and Inheritance .....	64
Inherited Diseases .....	65
Features of Inheritance .....	66
Discrete Inheritance and Mendel's Laws .....	66
Notation and Diagrams .....	67
Multiple Gene Interactions .....	67
Molecular Basis for Inheritance .....	67
DNA and Chromosomes .....	67
Reproduction .....	68
Recombination and Genetic Linkage .....	69
Gene Expression .....	69
Genetic Code .....	69
Nature and Nurture .....	70
Gene Regulation .....	71

Genetic Change .....	72
Mutations .....	72
Natural Selection and Evolution .....	73
Model Organisms .....	73
Medicine .....	74
Research Methods .....	74
DNA Sequencing and Genomics .....	75
How Genes Work .....	76
Genes Make Proteins .....	76
Genes are Copied .....	77
Genetic Engineering .....	77
Society and Culture .....	78
<b>Chapter 3 Mendelian Genetics .....</b>	<b>79</b>
Introduction .....	79
History .....	80
Mendel's Laws .....	81
Law of Segregation of Genes (the "First Law") .....	83
Law of Independent Assortment (the "Second Law") .....	83
Law of Dominance (the "Third Law") .....	84
Mendelian Trait .....	84
Examples .....	85
Trans Provable Mendel's to be Mendel's .....	85
Non-Mendelian Inheritance .....	86
Types of Non-Mendelian Inheritance .....	87
<b>Chapter 4 Chromosomal Abnormalities .....</b>	<b>91</b>
Introduction to Chromosome .....	91
History .....	95
Prokaryotes .....	96
Structure in Sequences .....	96
DNA Packaging .....	97
Eukaryotes .....	97
Chromosomal Characteristics .....	98
Structural Sequences .....	98
Protein-coding Genes .....	98
Genes that are used as RNA .....	99
Repeated Sequences .....	99
Retrotransposons .....	100
Other Sequences .....	100
Chromatin .....	100
Human Chromosomes .....	103

مكتبة كلية علوم الطبيعة والحياة

F.N.L.S.LIBRARY

جامعة أحمد زبانه غليزان

	Karyotype .....	103
	History of Karyotype Studies .....	105
	Observations on Karyotypes .....	106
	Diversity and Evolution of Karyotypes .....	108
	Depiction of Karyotypes .....	112
	Aberrations .....	114
	Sperm Aneuploidy .....	116
	Chromosome Abnormality .....	116
	Numerical Disorders .....	118
	Sperm Aneuploidy .....	118
	Structural Abnormalities .....	118
	Inheritance .....	119
	Acquired Chromosome Abnormalities .....	119
	DNA Damage during Spermatogenesis .....	119
	Detection .....	120
	Types of Chromosomal Abnormalities .....	120
	Cri-du-Chat Syndrome .....	120
	Down Syndrome .....	122
	47, XXY (Klinefelter Syndrome) .....	124
	Turner Syndrome .....	126
	Williams Syndrome .....	128
	How do Chromosome Abnormalities Happen? .....	130
<b>Chapter 5</b>	<b>Basic Concepts in Embryology</b> .....	<b>132</b>
	Introduction to Embryology .....	132
	Historical Review of Embryology .....	134
	Scope of Embryology .....	136
	Gametogenesis .....	137
	Embryonic Development in Chordates .....	137
	Yolk .....	137
	Types of Eggs .....	137
	Classification of Eggs on the Basis of Amount of Yolk .....	138
	Spermatozoa .....	138
	Embryonic Development of Animals .....	140
	Bilateria .....	140
	Drosophila Melanogaster (Fruit Fly) .....	142
	Vertebrate and Invertebrate Embryology .....	149
	Embryological Origins of the Mouth and Anus .....	151
	Evolutionary Origin .....	151
	Fertilisation in Chordates .....	152
	Significance of Fertilization .....	153
	Types of Fertilization .....	154

The Results of Fertilisation are .....	154
Cleavage .....	154
Types of Cleavage .....	156
Pattern of Cleavage .....	159
Stages of Embryogeny .....	160
Morula .....	160
Blastula .....	161
Gastrula .....	164
Organogeny .....	165
Derivatives of Germ Layers .....	166
Branches of Embryology .....	168
Descriptive Embryology .....	168
Experimental Embryology .....	168
Comparative Embryology .....	168
Chemical Embryology .....	168
Teratology .....	169
Modern Embryology .....	169
<b>Chapter 6 Molecular Genetics in Fisheries .....</b>	<b>170</b>
Introduction .....	170
Genetics and Fisheries Management .....	171
Population Genetics .....	171
Overview of Molecular Markers Used in Fisheries and Aquaculture .....	174
Allozyme .....	175
Mitochondrial DNA (mtDNA) .....	176
Multiple Arbitrary Primer Markers .....	178
Nuclear DNA Markers .....	180
Mitochondrial DNA Markers .....	184
New Developing Markers in Fisheries and Aquaculture .....	184
Expressed Sequence Tags (ESTs) .....	184
DNA Barcoding .....	185
Application of Molecular Markers Species Identification .....	186
Practical Applications in Fisheries and Aquaculture .....	187
Fisheries .....	187
Interaction between Fisheries and Aquaculture .....	195
Aquaculture .....	198
Parentage and Pedigree Analysis in Selective Breeding .....	200
<b>Chapter 7 Fish Development .....</b>	<b>206</b>
Introduction .....	206
Embryonic Development in Fish .....	207
Structure of Ovum .....	208

Fertilized Eggs .....	209
Formation of Blastodisc .....	210
Cleavage .....	210
32-Cell Stage .....	212
Early Morula .....	212
Late Morula .....	213
Blastula .....	213
Gastrula .....	214
Invagination or Emboly .....	215
Epiboly .....	216
Organisation of Fish Embryo .....	216
Organogenesis .....	216
Notogenesis .....	216
Neurogenesis .....	216
Hatching .....	217
Larval Development .....	217
The Formation of Germ Layers .....	219
Axis Formation in Fish Embryos .....	219
Dorsal-ventral Axis Formation: The Embryonic Shield .....	219
Anterior-posterior Axis Formation: Two Signaling Centers .....	222
Left-right Axis Formation .....	222
Enzyme in Fishes .....	222
Metabolism of Nitrogenous Wastes in Fishes .....	222
Neurulation .....	223
Sex Determination .....	223
<b>Chapter 8 Genetic Engineering in Aquaculture .....</b>	<b>225</b>
The DNA Construct .....	225
The Transgene .....	226
The Promoter .....	227
Transgene Delivery .....	228
Microinjection .....	228
Electroporation .....	230
Sperm-mediated Transfer .....	230
Biolistics .....	231
Viral Vectors .....	231
Lipofection .....	231
Transgene Integration .....	232
Detecting Integration and Expression of the Transgene .....	232
So much for transgenics – what about cloning? .....	236
Genetics .....	236

<b>Chapter 9 Phenotypic Variation and Environmental Effects</b> .....	239
Stocking Density and Mortality.....	241
Age, Temperature and Water Quality.....	241
Biology and Physiology.....	242
Maternal Effects.....	243
Correction of Growth Data.....	247
Skewness and Feeding Practices.....	249
Compensatory Gain.....	251
Communal Stocking/Evaluation.....	254
<b>Chapter 10 Polyploidy</b> .....	257
Polyploid Induction in Fish.....	258
Polyploid Induction in Shellfish.....	259
Triploid Cells.....	261
Ploidy Determination.....	262
Triploid Fish Performance.....	263
Growth.....	263
Feed Conversion and Consumption.....	267
Morphology, Meristics and Identification.....	267
Carcass Traits and Flesh Quality.....	268
Survival.....	270
Tolerance of Low Oxygen.....	271
Disease Resistance.....	273
Reproduction.....	274
Embryonic Development.....	277
Sex Ratio.....	277
Hybrid Viability.....	278
Heterozygosity in Triploids.....	279
Behaviour.....	279
Invertebrate Triploid Performance.....	280
Growth.....	280
Energy Storage and Bioenergetics.....	281
Survival and Disease Resistance.....	282
Reproduction.....	282
Reversion to Diploidy.....	284
Sex Ratio.....	284
Flesh Quality.....	284
Tetraploids.....	285
Tetraploid Induction.....	285
Fertility and Performance.....	286
Hexaploid Fish.....	288
Tetraploid Shellfish.....	288

Limitations and Constraints .....	288
Fisheries Management Applications .....	289
Environmental Protection .....	290
<i>Bibliography</i> .....	292
<i>Index</i> .....	296

جامعة أحمد زبانة غليزان
